Praktikum Jaringan & Komputer Modul 5 Praktikum

The image displays two screenshots of the Cisco Packet Tracer interface, showing a network topology and the configuration of a server named 'Server0'.

Top Screenshot: The network topology shows a central 'Server0' connected to a 'Switch0', which is then connected to three PCs (PC0, PC1, PC2). The 'Server0' configuration window is open, showing the 'FastEthernet0' interface settings. The IP Address is set to 192.168.123.1, and the Subnet Mask is 255.255.255.0. The Link Local Address is FE80::230:F2FF:FE06:A288.

Bottom Screenshot: The same network topology is shown, but the 'Server0' configuration window is now set to the 'Services' tab. The 'DHCP' service is enabled, and the 'Interface' is set to 'FastEthernet0'. The 'Pool Name' is 'serverPool'. The 'Start IP Address' is 192.168.123.19, and the 'Subnet Mask' is 255.255.255.0. The 'Maximum Number of Users' is 5. The 'TFTP Server' and 'WLC Address' are both set to 0.0.0.0.

Pool Name	Default Gateway	DNS Server	Start IP Address	Subnet Mask	Max User	TFTP Server	WLC Address
serverPool	0.0.0.0	0.0.0.0	192.168.123.19	255.255.255.0	5	0.0.0.0	0.0.0.0
